

Harshith P

Software Developer Engineer in Test | Bengaluru, Karnataka, India

+91 98862-05529 | harshithp951@gmail.com | linkedin.com/in/harshith-p

Summary

Software Developer Engineer in Test with 2+ years of experience in Python-based automation, API and end-to-end testing, performance engineering, CI/CD, and release validation. Strong foundation in financial systems, distributed systems, databases, networking, and performance optimization.

Experience

Associate Product Engineer – SDET

Jun 2025 – Present

Keenai Global, Bengaluru, India

- Increased regression coverage by 40% and reduced manual maintenance by 30% by developing reusable GenAI-powered infrastructure for UI/API test generation, request validation, locator resolution, self-healing, and model evaluation.
- Cut test development time by 55% by architecting an agentic automation framework using Claude to generate and execute Playwright UI and REST API tests.
- Investigated a high-severity Redis caching issue and contributed to a layered caching architecture, achieving an 88% cache hit rate, 2.5x higher throughput, and 43% lower database load through load testing.
- Designed and executed end-to-end test scenarios for the Pulse portfolio platform, validating workflows across 350K–400K+ transactions involving ETFs, bonds, equities, and structured products.

SDET-1

Aug 2024 – Jun 2025

Hyperface Technologies Pvt. Ltd., Bengaluru, India

- Designed and executed functional, API, regression, and performance testing for major releases, achieving 95% release stability and reducing post-release defects by 20%.
- Automated validation for AI model inference, APIs, and edge cases, improving Smart Benefits Engine stability from 84% to 92% and identifying 15+ critical failures before production.
- Validated end-to-end Outstanding-to-EMI and Transaction-to-EMI workflows, supporting INR 153M+ in transaction and outstanding balance conversions within four months.

SDET Intern

Feb 2024 – Jul 2024

Hyperface Technologies Pvt. Ltd., Bengaluru, India

- Developed and integrated 100+ automated REST API and UI tests into CI/CD pipelines, reducing release cycle time by 20% while supporting regression, functional, and release validation.

Summer Intern

Jul 2023 – Sep 2023

Bosch Global Software Technologies, Bengaluru, India

- Automated Coverity reporting and developed a diagnostic GUI to decode and trace CAN bus communications, improving embedded system debugging and reducing dependence on external hardware.

Projects

Algorithmic Intraday Trading Bot — GitHub

Python, WebSocket, KiteConnect, Pandas

- Built a real-time market data and algorithmic trading system with WebSocket-based OHLC aggregation and backtesting across multiple strategies; evaluated performance using Sharpe Ratio, Expectancy, Profit Factor, and Maximum Drawdown.

Spiking Neural Network Accelerator — Published Research

Python, Verilog, Xilinx Vivado, FPGA

- Co-authored and implemented an FPGA-based Spiking Neural Network accelerator for EEG motor-imagery classification, achieving 86.67% validation accuracy with an average classification latency of 4 ms.
- Designed the accelerator on a Zynq-7000 SoC, using parallel pipelining with 8 parallel 8-bit processing units to process 64-bit inputs and support real-time neural computation.

Hardware Cache Controller

Verilog, Xilinx Vivado

- Designed a Verilog-based hardware cache controller implementing LRU, Write-Back, and No-Write-Allocate policies across L1/L2 cache and main memory, achieving an 80–88% cache hit rate in simulation and reducing memory access latency.

Technical Skills

Languages: Python, Java, C++, C, TypeScript, SQL, Verilog

Test Automation: PyTest, Playwright, Selenium, Appium, XCUITest, REST Assured, BDD, TDD, Apache JMeter

Systems & DevOps: Linux, TCP, UDP, SFTP, Redis, WebSocket, CI/CD, Git, Jenkins, Docker, Kubernetes

Databases & Cloud: MySQL, PostgreSQL, MongoDB, AWS EC2, S3, RDS, CloudWatch

Education

B.E. in Electronics and Communication Engineering

Dec 2020 – Jun 2024

B.M.S. College of Engineering, Bengaluru, India

CGPA: 9.73

Gold Medalist (1st Rank, cohort of 222) | GATE EC Rank 1139 among 60K+ candidates

Certification

AWS Certified Developer – Associate (DVA-C02)
